

DIY How make Generator of fire with our own hands

Fire Generator - the effect is known for a long time, and is used in many places, from interior and fireplaces to concert lighting devices, but information about it, how to do this quite a little, what I want to fix this post.

Equipment needed

What will

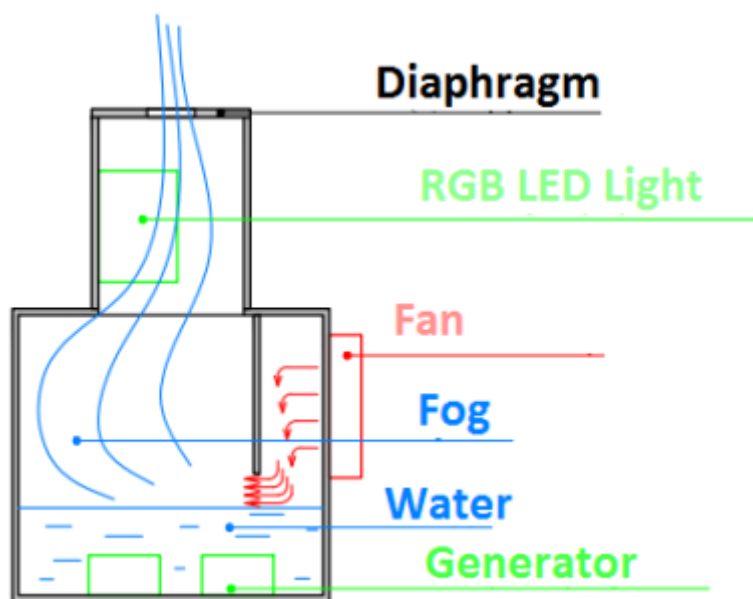

be required::

1. Distilled water;
2. Fan **90** mm;
3. DMX-controller Velleman K8062;
4. DMX decoder BESTEN Decoder 350;
5. LED RGB-lamp MD-9P;
6. 3 ultrasonic fog generators.

For DMX control, we can use a dimmer, or we can also assemble it by our own hands

One of the fog generators turned out to have their own unprogrammed flashing LED-lamps, but, fortunately, their light had absolutely no effect on the final result.

Assembly and installation
